Global Master's Program in Economics

Relevant faculty/ graduate school	Level	Degree-awarded/ non-degree
Economics	Master's program	Full-degree program
Duration		
2 years / Academic term: April - August, October - February		
Description		
<p>The Global Master Program (GMAP) in Economics is a unique interdisciplinary program with a particular emphasis on economics, law and business administration. The program is designed mainly to provide a new approach to studying international business for both Japanese and foreign students. All courses are taught in English, and some courses are taught collaboratively by our faculty and prominent foreign professors. After completion of this program, interested students can transfer to the doctoral program in our graduate school.</p>		

Social Sciences

International Master Programs in Economics

Relevant faculty/ graduate school	Level	Degree-awarded/ non-degree
Economics	Master's Program	Full-degree program
Duration		
2 years / Academic term: October - February		
Description		
<p>In this program, all lectures and seminars are conducted in English, enabling students to obtain master degrees in economics without taking any classes taught in Japanese. There is also a selection of economics-related courses available to students which are taught by the teaching staff of other schools (e.g. the Graduate School of International Cooperation Studies). Students in this program will deepen their knowledge and experience in an international and interdisciplinary environment.</p>

Medicine and Health Sciences

International Program for Medical Research

Relevant faculty/ graduate school	Level	Degree-awarded/ non-degree
Medicine	Doctoral program	Full-degree program
Duration		
4 years		
Description		
<p>This course aims to foster talented persons who take leadership positions in medical research. The system enables students to join the course for studying both clinical and basic research. Students can also take cross-disciplinary lab rotation and core lectures offered in English. Students select two areas of specialization, one from basic areas and another from clinical areas, both of which are relevant to disease. The curriculum enables systematic study of a broad spectrum of specialized knowledge ranging from investigation of basic clinical conditions to development of clinical strategies. We continue to contact alumni who return to their countries, trying to strengthen a network for human resource development.</p>
