

One day workshop in "Lessons from interaction between plant and microbe: strategies in symbiosis and competition"

12th Novembre 2013

Kobe University Brussels European Centre

Program

13:00

Getting together

13:30-14:00

Prof. Dr. Ken-ichi Yoshida (Kobe Univ, JP)

Possible inositol synthesis in rhizobia with physiological significance?

14:00-14:30

Dr. Jo Maertens (Ghent Univ, BE)

Metabolic engineering for the biotechnological production of chitooligomers

14:30-15:00

Dr. Claude Bruand (LIPM INRA, FR)

Nitric oxide (NO) in rhizobium-legume symbioses: a target to increase crop yields?

15:30-16:00

Break

16:00-16:30

Dr. Danny Vereecke (Ghent Univ, BE)

What can we learn from the leafy gall syndrome?

16:30-17:00

Prof. Dr. Toshiki Uchiumi (Kagoshima Univ, JP)

Cysteine rich peptides as host-derived molecules that regulate microsymbionts

17:00-18:00

General discussion

18:00

Closing remarks
